

In 2008 State Funded After School Programs Had a Direct Impact on Academic Achievement!

The numbers speak for themselves!

- 61% of after school students were at or above proficiency in Reading on their CMT scores. That's a four percentage point increase from the previous year. *This is a statistically significant accomplishment considering that programs are located in some of the most impoverished cities in Connecticut!*
- 73% of after school students were at or above proficiency in Math. Another four percentage point increase from the previous year!
- Students who regularly attended after school programs saw an eight percentage point jump in writing proficiency.
- After school students have a 95% attendance rate in school!

After School Programs Are Worth the Investment!
