

WORDLES

A wordle is a combination of words, letters or symbols that suggest, by the way they're arranged, a familiar phrase, saying or cliché. For example, box #1 depicts "side by side" while box #2 suggests "just between you and me." Those were fairly easy, but be on guard - others are much harder. Coming up with more than one ingenious solution for a particular wordle is fine. The last box has been left blank for you to invent and add one of your own.
